WORK EXPERIENCE

IT Consultant (ResTech Services), Minnesota State University, Mankato 01/2026 – Present

- Develop, test, and validate internal software workflows by diagnosing, reproducing, and resolving issues across Windows and macOS systems, ensuring consistent behavior across different operating environments and configurations.
- Analyze system behavior before and after fixes by comparing expected versus observed outcomes, validating execution paths, and confirming that changes improve stability without introducing regressions.
- Track software defects and enhancement requests using Jira, documenting clear reproduction steps, system conditions, observed behavior, expected results, and final verification status to support efficient debugging and issue resolution.
- Create and maintain technical documentation in Confluence, including troubleshooting guides, validation procedures, system behavior descriptions, and process workflows to improve knowledge sharing and reduce recurring issues.
- Follow issue execution paths to identify root causes, tracing failures through logs, configurations, and user actions, then confirming fixes through repeat testing and structured validation.
- Collaborate with technical staff using Git-based repositories, supporting version control best practices by aligning documentation, configuration updates, and fixes with tracked changes and team workflows.
- Communicate technical findings clearly to users and staff, translating technical issues into understandable explanations while supporting continuous improvement of internal tools, systems, and processes.

RSO Coordinator (Student Activities), Minnesota State University, Mankato 08/2025 – 12/2025

- Provided technical and system support for 200+ student organizations, troubleshooting access, forms, and platform issues.
- Troubleshooted common user issues by investigating root causes and providing clear step-by-step guidance.
- Collaborated in a team-based environment to resolve issues efficiently and meet service expectations
- Communicated professionally with students and staff in person and via email while maintaining a high standard of customer service.

Front Desk Assistant (Career Development Center), Minnesota State University, Mankato 04/2025 – 12/2025

- Delivered technical and administrative support by answering phones, emails, and assisting walk-in customers with scheduling systems, basic software navigation, and office technology questions.
- Managed high-volume communication channels, documenting and escalating issues accurately.
- Organized and maintain office files, ensuring proper documentation for smooth operations.
- Developed adaptability and communication skills in a fast-paced, service-oriented environment.

EDUCATION

Bachelor of Science in Computer Science, Minnesota State University, Mankato 05/2029 | GPA 3.7

Relevant Coursework: Computer Architecture, Algorithms, Data Structures, Python Programming, Calculus, Linear Algebra, Discrete Math, Logic Design

PROJECT

First Person Shooter Game, Data Structures 2025

- Designed and developed a Unity-based FPS game with emphasis on correct execution, debugging, and validation of gameplay logic.
- Identified, reproduced, and fixed issues related to control flow, animations, and audio systems.
- Used Git for version control to track changes, test fixes, and collaborate with teammates.
- Applied structured problem-solving and iterative testing techniques applicable to real-world software systems.

LEADERSHIP EXPERIENCE

Student Activities, Vice President (Maverick Involvement Team) 08/2025 – 12/2025

- Led collaborative workshops designed to build leadership, problem-solving and communication skills in students.
- Strengthened organizational, facilitation, and communication abilities by leading group sessions.
